Sandro Esteves, M.D., M.Sc., Ph.D.

Sandro Esteves is the Director of Androfert, Andrology & Human Reproduction Clinic in Campinas, Brazil. He holds this position since 1997.

Dr. Esteves graduated in 1990 at the University of Campinas (UNICAMP), Brazil, where he accomplished a residency program in General Surgery and Urology (1991-1995). He received his Master Degree in 1996 from the University of Campinas Medical School, Brazil, and his PhD in 1998 from the Federal University of São Paulo, Brazil. He did his post-residency training in Andrology and Male Infertility under a fellowship from the Cleveland Clinic Foundation International Center at the Center for Reproductive Medicine of the Glickman Urological & Kidney Institute in Cleveland, Ohio (1995-1996). Dr. Esteves is a Board certified Urologist by the Brazilian Society of Urology.

Dr. Esteves has published over 70 scientific papers and review articles in peer reviewed scientific journals, authored over 10 book chapters, and presented over 250 papers and lectures at both national and international scientific meetings. He is a member or office bearer of several professional societies including: Brazilian Society of Urology, Brazilian Society of Human Reproduction, Brazilian Society for Assisted Reproduction, American Society for Reproductive Medicine, Society for the Study of Male Reproduction and Urology. He is also an ad hoc reviewer for 10 scientific journals.

Dr. Esteves is the founder of Androfert, which is a referral center for male reproduction and was the first Brazilian Human Reproduction Clinic to obtain ISO 9001:2008 certification. All critical areas and laboratories are also certified as Cleanrooms according to the ISO 14.644. Androfert was awarded by the Brazilian Sanitary Surveillance National Agency (ANVISA) as the "State of the Art and Model Human Reproduction Clinic" in the country, the first fully in compliance with 2006 Brazilian Directive for Cells and Germinative Tissue Banks. His Clinic held training programs in the fields of male infertility, microsurgery, andrology laboratory and assisted reproduction techniques, and has trained approximately 100 reproductive specialists, including physicians, embryologists and laboratory technicians.

Dr. Esteves major interest areas are clinical male infertility, microsurgery, reproductive endocrinology, cryobiology, andrology and IVF laboratory techniques. He created the first hands-on microsurgery course for urologists in Brazil, sponsored by the Brazilian Society of Urology, which have trained over 300 urologists. Currently, he is member of the Andrology Committee of the Brazilian Society for Human Reproduction and a consultant of the Brazilian Sanitary Surveillance National Agency (ANVISA) in the area of "Cells and Germinative Tissues". He received the "Thomas S. Chang Award" in 1998 from the American Society of Andrology and the "Reproductive Research Center's Alumni of the Year Award" in 2006 from the Glickman Urological Institute of the Cleveland Clinic Foundation. Dr. Esteves has been cited in many international reference biographical publications.
